com.george.als.entities.food
Class Apple

```
java.lang.Object
  └com.george.als.entities.food.Food
      └com.george.als.entities.food.Apple
```

public class **Apple**
extends Food

Constructor Summary

Apple(int x, int y, int energyRegen, java.lang.String type, Map map)
    Default constructor for apples

Method Summary

Methods inherited from class com.george.als.entities.food.Food

getEnergyRegen, getType, getX, getY, update

Methods inherited from class java.lang.Object

equals, getClass, hashCode, notify, notifyAll, toString, wait, wait, wait

Constructor Detail

Apple

```
public Apple(int x,
             int y,
             int energyRegen,
             java.lang.String type,
             Map map)
```

    Default constructor for apples

    Parameters:
